# **SAFETY DATA SHEET**

B21HM917

## Section 1. Identification

| Product name                                 | : PROMAR® 200 Interior Latex Gloss Enamel<br>Duron 917 Shell White   |
|--|--|
| Product code                                 | : B21HM917   |
| Other means of<br>identification             | : Not available.   |
| Product type                                 | : Liquid.  |
| Relevant identified uses of t                | he substance or mixture and uses advised against   |
| Not applicable.                              |  |
| Manufacturer                                 | : THE SHERWIN-WILLIAMS COMPANY<br>101 W. Prospect Avenue<br>Cleveland, OH 44115                                |
| National contact                             | : The Sherwin-Williams Company<br>418 North Service Road East<br>Oakville, Ontario L6H 5R2 Canada              |
| Emergency telephone<br>number of the company | : US / Canada: (216) 566-2917<br>Mexico: SETIQ 01-800-00-214-00 / (52) 55-5559-1588 24 hours / 365 days a year |
| Product Information<br>Telephone Number      | : US / Canada: Not Available<br>Mexico: Not Available  |
| Regulatory Information<br>Telephone Number   | : US / Canada: (216) 566-2902<br>Mexico: Not Available   |
| Transportation Emergency<br>Telephone Number | : US / Canada: (800) 424-9300<br>Mexico: SETIQ 01-800-00-214-00 / (52) 55-5559-1588 24 hours / 365 days a year |

## Section 2. Hazards identification

| Classification of the substance or mixture | : CARCINOGENICITY - Category 2<br>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2   |
|--|---|
|  | Percentage of the mixture consisting of ingredient(s) of unknown oral toxicity: 12.8%<br>Percentage of the mixture consisting of ingredient(s) of unknown dermal toxicity: 12.8%<br>Percentage of the mixture consisting of ingredient(s) of unknown inhalation toxicity: 14% |
| GHS label elements                         |   |
| Hazard pictograms                          |   |
| Signal word                                | : Warning   |
| Hazard statements                          | <ul> <li>Suspected of causing cancer.<br/>May cause damage to organs through prolonged or repeated exposure.</li> </ul>   |
| Precautionary statements                   |   |
| General                                    | : Read label before use. Keep out of reach of children. If medical advice is needed, have product container or label at hand.   |
| Date of issue/Date of revision             | : 9/9/2017 Date of previous issue : 8/16/2017 Version : 5.02 1/11   |

## Section 2. Hazards identification

| Prevention                       | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves. Wear eye or face protection. Wear protective clothing. Do not breathe vapor. |
|----------------------------------|--|
| Response                         | : Get medical attention if you feel unwell. IF exposed or concerned: Get medical attention.  |
| Storage                          | : Store locked up.   |
| Disposal                         | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label<br>elements   | WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.  |
|                                  | Please refer to the SDS for additional information. Keep out of reach of children. Do not transfer contents to other containers for storage.   |
| Hazards not otherwise classified | : None known.  |

## Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

#### CAS number/other identifiers

| Ingredient name            | % by weight | CAS number |
|----------------------------|-------------|------------|
| Titanium Dioxide           | 12.77       | 13463-67-7 |
| Heavy Paraffinic Oil       | 1.21        | 64742-65-0 |
| 2-(2-Butoxyethoxy)-ethanol | 1.2         | 112-34-5   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

| <u>Description of necessary f</u> | <u>irst a</u> | <u>d measure</u>  | <u>es</u>  |   |   |   |   |
|-----------------------------------|---------------|---|--|---|---|---|---|
| Eye contact                       | :             | eyelids. C  | ly flush eyes with plenty c<br>heck for and remove any<br>Get medical attention.   |   |   |   |   |
| Inhalation                        | :             | not breath<br>respiration<br>aid to give<br>in recover                              | ictim to fresh air and keep<br>ing, if breathing is irregula<br>or oxygen by trained per<br>mouth-to-mouth resuscit<br>y position and get medica<br>ht clothing such as a colla  | ar or if respiratory arr<br>sonnel. It may be da<br>ation. Get medical a<br>I attention immediate   | est occurs, pro-<br>ingerous to the<br>ttention. If unc<br>ly. Maintain ar  | vide artificia<br>person pro<br>onscious, p   | al<br>viding<br>blace                   |

## Section 4. First aid measures

| Most important symptoms/e       | effects, acute and delayed   |
|---------------------------------|--|
| Potential acute health effe     | <u>cts</u>   |
| Eye contact                     | : No known significant effects or critical hazards.  |
| Inhalation                      | : No known significant effects or critical hazards.  |
| Skin contact                    | : No known significant effects or critical hazards.  |
| Ingestion                       | : No known significant effects or critical hazards.  |
| <u>Over-exposure signs/symp</u> | <u>otoms</u>   |
| Eye contact                     | : No specific data.  |
| Inhalation                      | : No specific data.  |
| Skin contact                    | : No specific data.  |
| Ingestion                       | : No specific data.  |
| Indication of immediate me      | dical attention and special treatment needed, if necessary   |
| Notes to physician              | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>                          |
| Specific treatments             | : No specific treatment.   |
| Protection of first-aiders      | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

## Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|--|
|                                |  |

| Date of issue/Date of revision | : 9/9/2017 | Date of previous issue | : 8/16/2017 | Version : 5.02 | 3/11 |
|--------------------------------|------------|------------------------|-------------|----------------|------|
|--------------------------------|------------|------------------------|-------------|----------------|------|

## Section 6. Accidental release measures

| For emergency responders     | :  | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |  |  |
|------------------------------|----|---|--|--|
| Environmental precautions    | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).   |  |  |
| Methods and materials for co | nt | ainment and cleaning up   |  |  |
| Small spill                  | :  | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |  |  |
| Large spill                  | :  | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |  |  |

## Section 7. Handling and storage

| Precautions for safe handling                                      |   |   |
|--|---|---|
| Protective measures  | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not breathe<br>vapor or mist. Do not ingest. If during normal use the material presents a respiratory<br>hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Empty containers retain product residue and can be<br>hazardous. Do not reuse container. | , |
| Advice on general occupational hygiene                             | Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed. Workers should wash hands and face before eating,<br>drinking and smoking. Remove contaminated clothing and protective equipment befor<br>entering eating areas. See also Section 8 for additional information on hygiene<br>measures.  |   |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible material (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 incompatible materials before handling or use.  |   |

## Section 8. Exposure controls/personal protection

**Control parameters** 

Occupational exposure limits (OSHA United States)

## Section 8. Exposure controls/personal protection

| Ingredient name Exposure limits |   |  |  |
|---------------------------------|---|--|--|
| Titanium Dioxide                | ACGIH TLV (United States, 3/2016).                  |  |  |
|                                 | TWA: 10 mg/m <sup>3</sup> 8 hours.                  |  |  |
|                                 | OSHA PEL (United States, 6/2016).                   |  |  |
|                                 | TWA: 15 mg/m <sup>3</sup> 8 hours. Form: Total dust |  |  |
| Heavy Paraffinic Oil            | OSHA PEL (United States, 6/2016).                   |  |  |
|                                 | TWA: 5 mg/m <sup>3</sup> 8 hours.                   |  |  |
|                                 | ACGIH TLV (United States, 3/2016).                  |  |  |
|                                 | TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Inhalable   |  |  |
|                                 | fraction  |  |  |
|                                 | NIOSH REL (United States, 10/2016).                 |  |  |
|                                 | TWA: 5 mg/m <sup>3</sup> 10 hours. Form: Mist       |  |  |
|                                 | STEL: 10 mg/m <sup>3</sup> 15 minutes. Form: Mist   |  |  |
| 2-(2-Butoxyethoxy)-ethanol      | ACGIH TLV (United States, 3/2016).                  |  |  |
|                                 | TWA: 10 ppm 8 hours. Form: Inhalable                |  |  |
|                                 | fraction and vapor                                  |  |  |

#### **Occupational exposure limits (Canada)**

| Ingredient name | Exposure limits  |  |  |
|-----------------|--|--|--|
|                 | <b>CA Ontario Provincial (Canada, 7/2015).</b><br>TWA: 10 ppm 8 hours. Form: Inhalable<br>fraction and vapour. |  |  |

#### **Occupational exposure limits (Mexico)**

| Ingredient name | Exposure limits  |
|-----------------|--|
|                 | ACGIH TLV (United States, 3/2016).<br>TWA: 10 ppm 8 hours. Form: Inhalable<br>fraction and vapor |

| Appropriate engineering controls | : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.  |
|----------------------------------|---|
| Environmental exposure controls  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measure    | <u>S</u>  |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.                                 |
| Skin protection                  |   |

## Section 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
|------------------------|--|
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved by a<br>specialist before handling this product.  |
| Respiratory protection | <ul> <li>Based on the hazard and potential for exposure, select a respirator that meets the<br/>appropriate standard or certification. Respirators must be used according to a<br/>respiratory protection program to ensure proper fitting, training, and other important<br/>aspects of use.</li> </ul>   |

## Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |
|--|---|
| Physical state                               | : Liquid.   |
| Color  | : Not available.  |
| Odor   | : Not available.  |
| Odor threshold                               | : Not available.  |
| рН   | : 9.2   |
| Melting point                                | : Not available.  |
| Boiling point                                | : 100°C (212°F)   |
| Flash point                                  | : Closed cup: >93.3°C (>199.9°F)                                  |
| Evaporation rate                             | : 0.09 (butyl acetate = 1)  |
| Flammability (solid, gas)                    | : Not available.  |
| Lower and upper explosive (flammable) limits | : Lower: 0.9%<br>Upper: 5.9%                                      |
| Vapor pressure                               | : 2.3 kPa (17.5 mm Hg) [at 20°C]                                  |
| Vapor density                                | : 1 [Air = 1]   |
| Relative density                             | : 1.16  |
| Solubility                                   | : Not available.  |
| Partition coefficient: n-<br>octanol/water   | : Not available.  |
| Auto-ignition temperature                    | : Not available.  |
| Decomposition temperature                    | : Not available.  |
| Viscosity                                    | : Kinematic (40°C (104°F)): >0.205 cm <sup>2</sup> /s (>20.5 cSt) |
| Molecular weight                             | : Not applicable.   |
| Aerosol product                              |   |
| Heat of combustion                           | : 1.14 kJ/g   |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name    | Result                   | Species       | Dose                       | Exposure |

## Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 15. Regulatory information

#### SARA 313

SARA 313 (40 CFR 372.45) supplier notification can be found on the Environmental Data Sheet.

#### California Prop. 65

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

## Section 16. Other information

Hazardous Material Information System (U.S.A.)

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

Procedure used to derive the classification

| Classification  | Justification      |
|---|--------------------|
| CARCINOGENICITY - Category 2                                    | Calculation method |
| SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 | Calculation method |

- Date of issue/Date of revision
- : 9/9/2017

Date of previous issue : 8/16/2017

#### Notice to reader

It is recommended that each customer or recipient of this Safety Data Sheet (SDS) study it carefully and consult resources, as necessary or appropriate, to become aware of and understand the data contained in this SDS and any hazards associated with the product. This information is provided in good faith and believed to be accurate as of the effective date herein. However, no warranty, express or implied, is given. The information presented here applies only to the product as shipped. The addition of any material can change the composition, hazards and risks of the product. Products shall not be repackaged, modified, or tinted except as specifically instructed by Sherwin-Williams, including but not limited to the incorporation of non Sherwin-Williams products or the use or addition of products in proportions not specified by Sherwin-Williams. Regulatory requirements are subject to change and may differ between various locations and jurisdictions. The customer/buyer/user is responsible to ensure that his activities comply with all country, federal, state, provincial or local laws. The conditions for use of the product are not under the control of the manufacturer; the customer/buyer/user is responsible to determine the conditions necessary for the safe use of this product. The customer/buyer/user should not use the product for any purpose other than the purpose shown in the applicable section of this SDS without first referring to the supplier and obtaining written handling instructions. Due to the proliferation of sources for information such as manufacturer-specific SDS, the manufacturer cannot be responsible for SDSs obtained from any other source.
